

ManpowerGroup is a global leader in workforce solutions.

On behalf of our client, Adriatic Metals BH, a company engaged in the exploration and development of precious and base metals, and the owner of the globally advanced polymetallic Vareš Project, Manpower SEE is seeking a motivated candidate to fill the position:

### **Control Room Operator (Vareš, Bosnia & Herzegovina)**

#### **Job duties:**

- Identification and consistent implementation and monitoring of major hazard critical controls.
- Assessing, creating, and maintaining a safe work environment via effective hazard identification, notification, and control.
- Operating process plant fixed and mobile equipment in accordance with Adriatic Metals safe work methods.
- Actively participate in task specific planning.
- Demonstrate and maintain high standards of personal hygiene to minimise occupational health and hygiene exposures.
- Demonstrate personal commitment to safety, environmental and social responsibility practices.
- Actively seek improvements to health and safety related risk management.
- Operating process plant fixed and mobile equipment within equipment specific design specifications.
- Identifying, initiating, and coordinating process plant unplanned maintenance activities.
- Supporting maintenance personnel in the coordination and delivery of the process plant planned maintenance program.
- Monitor agreed plant performance metrics (including KPI's and maintenance metrics) in accordance with agreed monitoring and inspection regimes.
- Notify and appropriately escalate any non-conformance and/or deviation against plant performance metrics.
- Monitoring, reporting and maintaining critical spares inventory in accordance with critical spares strategy.
- Monitoring, reporting and maintaining reagent storage and inventory in accordance with minimum reagent inventory requirements.
- Implement, monitor compliance with and report periodical emergency system (e.g. alarm activation systems and fire protection systems) in accordance with process plant planned inspections and maintenance.

#### **Job requirements:**

- Secondary School Qualification
- English Proficiency – B2
- Experience with SCADA system or similar in a previous position within a flotation plant
- Manage process variations with limited/no supervision
- Previous experience training new Control Room Operators
- Capture and report downtime events and causes to technical team
- Follow agreed operational parameters
- 5-years experience in same or similar position with flotation process
- Training in hierarchy of emergency response situations
- Light Vehicle (Car) Driver's licence
