- English proficiency is a must as most of our communication is in English
- Paying attention to UI/UX details
- Fast learner and self driven personality
- Clear and structured way of communicating and open for feedback around areas that can be improved

### Nice to have

- Experience in Angular 9+
- Basic understanding of git version control and Gitflow branching model
- Bachelor's or higher degree in Computer Science, Information Technology or similar area
- Understanding of Amazon Web Services
- Experience with Jira and Confluence

## Responsibilities

- Develop new features with high quality

- Analyze and solve issues that will be reported by the stakeholders
- Estimate tasks and ask questions for the edge cases when they were not specified
- Document changes

### What we offer

- Ability to grow your Angular development skills under an experienced senior engineer.
- Competitive compensation
- Certifications
- Proactive and helpful colleagues, a really fun team to work with, in one of the fastest-growing industries out there.
- Free coffee and drinks in the office.
- Private health insurance.
- Various events and team buildings.
- We are located in Park Residence, an easily accessible location with free parking space.

Does the above motivate you? Then we would like to hear from you!
