

C#/ASP.NET MVC Web Developer

(with UI experience)

We are hiring mid-level/experienced and senior C# web developers to join our agile development team. We are looking for self-starters that can solve problems independent and creatively, communicate effectively, and collaborate well with team members.

Together you will be responsible for a large-scale business platform which is growing rapidly. Depending on your experience level, you will be responsible for extending the existing platform, primarily on the front end layer, manage data migrations or implement specific requirements. All positions available immediately.

Required is:

- Proven experience in design and development of web applications using: C#, .NET MVC, EF (SQL Server), SQL/TSQL, jQuery, Ajax, HTML5 and CSS
- Hands-on experience in building rich user interfaces and applications
- Good understanding of end to end application development (data layers, business layers etc.), but will mainly focus on the UI side

- Results-oriented professional with proven ability to excel in a fast-paced, multifaceted team environment
- Able to prioritize tasks within a dynamic business environment
- Good English knowledge
- German language knowledge (spoken + written) is a big plus!

Interested developers send their cv to jobs.bbm@gmail.com.
