Senior Security Operations Engineer - Security DC (m/f/d)

What you do

Plan, build and run the SIEM and related services, infrastructure.

Ensure troubleshooting, release management, and deployments on OS and application level for systems and infrastructure components, related to SIEM.

Design the architecture of SIEM related systems and integrate them into the infrastructure.

Provide support and coordination, during data onboarding.

Create reports and dashboards in Splunk.

Guarantee support compliance controls (e.g. SOX, ISAE, ITGC).

Data source onboarding and quality management, operational tasks like troubleshooting and backups.

Develop automation and orchestration for standard security operating procedures.

What you offer

BSc or MSc in Information Security, Computer Science, Engineering, or similar. Relevant security certifications are a plus.

Experience in working in large scale and heterogeneous IT environments.

Advanced knowledge of Splunk and knowledge on cloud services (technically and functionally) especially M365 and MS Azure & Security Modules.

Knowledge in state-of-the-art IT cybersecurity architectures, hardware, and software implementations for large organizations using either enterprise based and/or cloud-based environments.

Interest in identifying cybersecurity gaps in IT network and systems designs or implementations, and in recommending mitigation strategies to address the identified gaps.

Strong analytical and problem-solving skills with the capability to identify solutions to unusual and complex problems.

Knowledge of security specific frameworks (e.g. Mitre) is a plus.

Excellent interpersonal communication and organizational skills.

Fluency in English. Knowledge of any A1 Group language is an asset.
