

Cloud Infrastructure / Kubernetes Engineer

About us

LiveDOOH Signkick is an innovative technology platform helping Out-of-Home media owners revolutionize the way they connect with advertisers.

It's an exciting time to be in Out-of-Home (or Outdoor Advertising as it's sometimes known). The industry is undergoing rapid digital transformation, bringing with it new opportunities and challenges. Through intelligent automation, data analysis and optimisation, our tools are changing the way our clients – global brands like JCDecaux, Clear Channel and Global Outdoor – grow their businesses. From booking to screen, our technology emboldens them with dynamic new ways to connect with audiences in the real world, and deliver better ads for everyone.

LDSK, as we call ourselves for short, is the result of a merger between two leading technology companies, LiveDOOH and Signkick. Sharing a vision for our industry, individually, we'd developed complementary products and teams. As we charge into our next phase of growth together, we're looking for smart, driven and fun-loving people to join us.

How you'll make an impact

We're a high-performing team on a mission to build the number one media owner platform in the world.

As a key member of the Cloud Platform and DevOps team, you'll be working with talented, cross-functional, highly-motivated international teams, acting as a bridge between application developers and the underlying infrastructure, strengthening the DevOps culture, working with innovative technologies, and ensuring that our systems are ready for Internet scale.

What you'll be doing

- Ensure that our applications are meeting our operation, availability, monitoring, and performance standards throughout our different environments
- Manage and provision cloud with Infrastructure as a Code tools
- Contribute to our Kubernetes orchestrated infrastructure on our cloud platforms
- Creation of automation tasks and processes
- Define and document best practices and strategies regarding application deployment and infrastructure maintenance
- Ensure application performance, uptime, and scale, maintaining high standards for code quality and thoughtful design
- Manage cloud environments in accordance with company security guidelines
- Troubleshoot incidents, identify root causes, fix and document problems, and implement preventive measures

The stack

- Kubernetes
- Docker
- GCP, AWS, Azure
- Linux (Ubuntu, Debian)
- MongoDB
- PostgreSQL
- Terraform
- Ansible
- Prometheus
- ELK stack

What you'll need

- University degree in Computer Science or equivalent experience
- Cross platform configurations and troubleshooting (Windows, Linux)
- Basic knowledge of container orchestration specifically Kubernetes

- Good understanding of configuration and troubleshooting of Linux, PHP/.Net Core, Docker systems.
- Basic knowledge of Public cloud concepts
- Are good in working together with colleagues from different disciplines;
- Passion for resolving reliability issues and identify strategies to mitigate going forward
- Excellent command / highly proficient in spoken and written English

What will help

- Network and system analysis experience
- Linux system-level analysis capabilities
- Basic software engineering skills ideally with experience in Python and/or /C#
- Basic knowledge of containers and Kubernetes
- Basic knowledge of Cloud Computing platforms
