Open Data, an Italian software house, is looking for **Intermediate Backend developer** to expand the Skopje team. Explore new technologies and join the fourth industrial revolution!

Intermediate Backend developer

Responsibilities:

- Contribute to the design, development and testing of mission-critical applications
- Work collaboratively in a team environment
- Ensure high quality and timely delivery of software development projects
- Adhere to company coding standards including unit testing and peer code reviews
- Provide production support as necessary

Requirements:

- Bachelor's Degree in Computer Science, Information Systems (or related field of study)
- 2+ years of professional experience in software development for server-side applications
- Excellent knowledge in C# and .NET Core
- Experience with relational database systems, big data, preferable SQL Server
- Familiarity with web based applications and micro services architecture
- Knowledge of JavaScript and the Angular framework will be considered a plus
- Comfortable with code versioning tools, preferably Git
- Great communication skills, team player, independent and professional
- Fluent English is mandatory, Italian is a plus

Salary:

Depending on the skills and work experience.

If you believe that your experience and skills set would make the expected contribution, please send your CV, stating the position title, to our address **slavica.bezanic@opendatasrl.it**, with full confidentiality.

Please note that only short-listed candidates will be invited for an interview.
