

CEMENTARNICA USJE AD SKOPJE, TITAN GROUP

IS HIRING

READY-MIX CONCRETE ENGINEER

Join our team at Cementarnica USJE, a leading player in the cement industry committed to excellence in manufacturing and sustainability. We are dedicated to producing high-quality products while minimizing our environmental footprint. As we expand our operations, we are seeking a skilled RMC Engineer to join our dynamic team.

JOB BRIEF:

The RMC Engineer will play a crucial role in ensuring the efficient and safe operation of our ready-mix concrete plant. The RMC Engineer will be responsible for overseeing the production process, optimizing efficiency and implementing continuous improvement initiatives to meet customers' needs. The ideal candidate will have a strong background in civil engineering or technology, with previous experience in the industry preferred.

KEY RESPONSIBILITIES:

- Manage and control the production process according to internal requirements and customer demands.
- Responsible for the implementation and enforcement of valid standards.
- Responsible for the implementation of safety procedures and overall improvement of safety levels.
- Collaborate with project managers on construction sites and with customers.
- Maintain constant communication with site managers to ensure timely and accurate delivery of ready-mix concrete.
- Coordinate the delivery of ready-mix concrete to construction sites.
- Analyse production results of ready-mix concrete and provide suggestions for quality improvement and recipe optimization.
- Continuously monitor the quality of produced concrete and notify the department manager promptly in case of any quality concerns.
- Arrange the necessary documentation for ready-mix concrete deliveries (delivery notes and invoices), as well as reconcile daily production.
- Responsible for the timely procurement of raw materials.
- Responsible for testing raw materials (aggregates).
- Participate in new projects in collaboration with the sales department and the group level.
- Assist in the administration of documentation within the department; create orders in the SAP system.
- Responsible for creating new recipes in Protem Lab and SAP
- Provide support to other departments (Lab and Sales) by preparing relevant reports on their operations.

- Responsible for timely maintenance of equipment through coordination with mechanical and electrical maintenance departments.

SKILLS AND QUALIFICATIONS:

- University degree in Civil Engineering or Technology
- Related experience in a similar role in the construction industry or construction material industry will be considered a plus.
- Knowledge of the applicable concrete and aggregates standards will be an asset.
- Commitment to safety, environment, quality, and continuous improvement.
- Proficiency in digital skills (MS Office and other AI tools),
- English proficiency, advanced level of written and verbal English
- Knowledge and operation in the SAP system.

PREFERRED ATTRIBUTES:

- Willingness for learning and self-improvement
- Excellent communication and leadership skills.
- Ability to work effectively in a fast-paced environment and lead a team.
- Ability to function well in a high-paced environment.
- Business sense - has a strong business sense and can decipher priorities and make sound judgment calls when needed.

WHAT WE OFFER:

- Attractive remuneration and benefits package, including:
 - Incentives and bonuses
 - Wellbeing incentives: Private medical insurance, free sports activities, free weekday lunch, free legal, financial & mental health consultations
 - Maximum vacation allowance
 - Parental and family benefits
- Career development and training opportunities
- Positive, encouraging and attractive working environment
