WE ARE HIRING!

DevOps Engineer

Vesica is an European IT solutions delivery center that has network of 14 competences centers across central and eastern Europe, with core competences in OpenText, SAP, Microsoft Dynamics, Salesforce.com and Data Science. Enabling our global customer base through technology excellence, R&D and innovation, we are focusing on advanced engineering services and bespoke consultancy in the domains of Digital, Data and Cloud.
We have offices in Skopje, Sofia, Cluj Napoca but we prefer remote work and we have several openings.

Vesica for the client's needs is hiring a DevOps Engineer. The current challenges are:

- reposition the entire software stack to a modern cloud architecture (java microservices on kubernetes framework running in AWS communicating via GraphQL, controlled by Ansible Tower)
- introduce analytics
- reposition the content storage to allow a versioning, publishing.

For this transition a key position is the DevOps engineer who will define these new processes.

Essential Responsibilities:

- Design and implement build, deployment, and configuration management
- Test implemented designs

- Build and test automation tools for infrastructure provisioning
- Handle code deployments in all environments (DEV, QA, BETA, PROD)
- Monitor metrics and develop ways to improve
- Provide technical guidance and educate team members and coworkers on development and operations
- Brainstorm for new ideas and ways to improve development delivery
- Build, maintain, and monitor configuration standards
- Maintain day-to-day management and administration of projects
- Document and design various processes; update existing processes
- Create an update schedule and apply security patches

Qualifications:

- Bachelor's degree in CS, engineering, software engineering, or related field
- Minimum 5 years' previous experience in development and operations, or related IT, computer, or operations field
- Previous experience with software development, infrastructure development, or development and operations
- Experience with Linux infrastructures, database SQL (MS SQL), CI/CD tools, scripting such as JavaScript, PHP, Python, Perl, Ruby
- Up-to-date on the latest industry trends; able to articulate trends and potential clearly and confidently
- Good interpersonal skills and communication with all levels of management
- Able to multitask, prioritize, and manage time efficiently

Specifics and benefits:

- Competitive salary package
- Floating Working hours but also working with the teams New York Time zone.
- Flexible organization of job assignments
- 100% remote work, but office available in Skopje city center.
- A Mobile phone with monthly limits
